Welcome to HEMCO®

HEMCO a leading manufacturer of innovative laboratory equipment serving the Sciences and R&D Technology Industries since 1958.

Located in Independence, Missouri, the heart of America and the crossroads of North America a major center for transportation, communication, distribution, and manufacturing industries worldwide.

HEMCO's modern manufacturing and distribution facilities combined with our extensive engineering, design, and manufacturing capabilities are the solution for your Laboratory Planning requirements.

HEMCO Plan-A-Lab Worksheet showing Groupings

The HEMCO Plan-A-Lab enables you to conveniently lay out your lab furniture and your pre-engineered modular clean lab. For more information request the Modular Clean Room Brochure. Shown below is a 20' X 24' (2) wall system. Existing walls in black, new walls in yellow slash mark.

For Lab Planning worksheet visit: www.hemcocorp.com/images/Literature/PlanALab.pdf shown above 20' X 24' (2) wall system

UniLine Laboratory Casework Construction (SEFA 8 Compliant)

UniLine Casework is constructed of welded 18 gauge steel. Powder coat finish is environment friendly, attractive and long lasting, color: Lab White. Modular design allows for simple field conversion from inlet to overlay, door and drawer re-configurations and hardware component changes. Casework is tested independently to be SEFA 8 load bearing capacity compliant.

worksurface page 12

Rear Filler Panel
Cat. No. 74112

48" Cabinet
Cat. No. 71064
epoxy, stainless steel and phenolic worksurfaces available

Recessed Toe Space promotes laboratory cleanliness. Cabinet base lower corner reinforcing gusset with 0 to 2-1/2" zinc leveling bolts on (all four corners). Cabinet height adjustable from 35" to 37". 12 gauge steel corner gusset (4) each cabinet.

Drawer Bodies constructed of 20 gauge steel. 18 gauge drawer suspension with full extension ball bearing drawer slide. File drawer suspension available in both 100 and 150 lb capacity. Exterior is urethane powder coated steel, for chemical and abrasion resistance.

Doors double wall construction with 20 gauge reinforcing channel (1) per door. Rubber door bumpers (4) per door. Five knuckle hinges (2) per door. Nylon roller catch (1) per door. Urethane powder coated steel. Manual, self closing.

Cabinet Interior Full length & width adjustable 20 gauge steel shelf for maximum Storage. Zinc plated adjustable steel shelf clips. Powder coated finish for chemical resistance. 18 gauge full height removable access panel. Color: Lab White

Laboratory Furniture Groupings

UniLine design incorporates our most popular casework groupings to meet your laboratory needs. Welded steel with chemical resistant, epoxy powder coat finish, and 1" thick phenolic resin countertops, 4" high backsplashes, and flush ends standard. Standard height 36", ADA height 34", and sitting height 28" options are available. Standard color: Lab White. (optional colors are available as required) Groupings can be supplied with optional Fume hoods.

Atlantis Grouping

Atlantis Grouping provides basic lab Storage & a versatile work area. Cabinet grouping includes 3 standing height cabinets with rear filler panels on both ends, phenolic resin worksurface with 4" high back splash. Includes 16" X 12" X 8" sink and H/C gooseneck faucet.

Atlantis Cabinet Grouping

Enterprise Grouping

Enterprise Grouping provides a convenient balance of Storage and work space. Cabinet grouping includes 3 standing height cabinets with rear filler panels, 2 wall cabinets, phenolic resin worksurface with 4" high back splash. Includes 16" X 12" X 8" sink, 30" X 30" pegboard and H/C gooseneck faucet.

Enterprise Cabinet Grouping

Endeavour Island Grouping

Endeavour Grouping is a flexible design that can serve as an island or peninsula layout. Cabinet grouping includes either 3 or 7 standing height cabinets with front and end filler panels, phenolic resin worksurface, and center island reagent shelf with pedestals and phenolic resin shelf. Includes 16" X 12" X 8" sink, 30" X 30" pegboard and H/C gooseneck faucet.

UniLine Furniture Groupings

Unitized design incorporates our most popular casework groupings to meet your laboratory needs. Welded steel with chemical resistant, epoxy powder coat finish, and 1" thick phenolic resin worksurface, 4" high backsplashes, and flush ends standard. ADA height 34" Max, and sitting height 28", options are available. Standard color: Lab White (optional colors are available as required)

Artemis Grouping

UniLine Artemis Grouping provides ample lab Storage with options. Cabinet grouping includes (3) 36" high cabinets, phenolic resin worksurface, with 4" high back splash. Includes 16" X 12" X 8" sink and H/C gooseneck faucet, and three wall cabinets. Add a UniFlow SL fume hood in widths of 48", 60", 72", and 96" wide see page 15.

UniLine Furniture Groupings

Unitized design incorporates our most popular casework groupings to meet your laboratory needs. Welded steel with chemical resistant, epoxy powder coat finish, and 1" thick phenolic resin worksurface, 4" high backsplashes, and flush ends standard. ADA and sitting height options are available. Standard color: Lab White (optional colors are available as required)

Gemini Grouping

UniLine Gemini grouping features a sitting height desk area that can be incorporated with any of the HEMCO groupings. Cabinet grouping includes one sitting height file drawer cabinet with knee space panel, single apron, and phenolic resin worksurface. Sitting height 28".

ADA

Freedom (ADA) Grouping Option

When ADA requirements are necessary, the UniLine Freedom Grouping option allows you specify any HEMCO casework grouping and be compliant to all dimension, space, and access standards as specified by ADA. In addition, all electrical services, plumbing accessories and safety equipment including emergency showers and eye wash stations are designed to meet ADA guidelines. Counter top height is 34". For ADA recommended reach see diagram 1 and 2.

Simply add "ADA" as a suffix to any HEMCO part number and HEMCO can design, quote, and supply ADA compliant equipment. Proper planning eliminates/reduces future problems. For a complete guide for all ADA technical information, including dimensions and standards, please visit: www.access-board.gov.

UniLine Base Cabinets

Lab cabinets are offered in standard modular sizes that allow you to create a custom laboratory to meet your specific needs. Cabinets feature furniture grade welded steel construction with a durable, chemical resistant, epoxy powder coat finish that meet or exceed SEFA 8, recommended practice for laboratory casework. Standard color: Lab White (optional colors are available as required) (Available in Stainless Steel or Polypro) (and ADA heights).

Cabinet Lock

Five-Disc tumbler door & drawer cam lock & (2) keys.

Cat. No. 75001

Utility Chase

24" wide x 6" deep x 84" high. Located on an island behind a sink. Used to conceal piping and to serve as mounting for pegboard.

Cat. No. 75091

Rear Filler Panel

35" high x 7" wide. Used to enclose pipe chase behind cabinets on standard 30" deep counters.

Cat. No. 74112

Center Filler Panel

35" high x 4", 10", or 14" wide. Used to enclose the pipe chase at the end of an island. Please specify width.

Cat. No. 74122

Front Filler Panel

35" high x 2", 6", or 12" wide. Used to enclose the space between cabinets to meet casework length requirement. Please specify width.

Cat. No. 74142

End Scribe

35" high x 2", 6", or 12" wide. Used to fill the space between the end of casework and a wall. Please specify width.

Cat. No. 74001

UniLine ACID Storage Cabinets

- Molded one piece chemical and acid resistant, composite liner, molded one-piece covered corners, glass smooth for ease of cleaning
- Cabinet Exhaust can be vented out the back or through the fume hood or through an exhaust blower system
- Removable rear panel allows access to connect venting
- Removable Shelf for small container Storage
- Front Access doors are lined and edges are sealed
- Door Vents provide Supply air ventilation
- Removable containment tray
- Containment Lip on front bottom edge of cabinet to hold spills

For Storage of ACID and corrosive chemicals, available in 12", 18", 24", 30", 36", 42" & 48" widths. Standard 35 1/4" high and 22" deep cabinet dimension. (as shown) U.L. 1805 Fume Hoods & Cabinets. Cabinets are designed to hold specific chemicals

Acid Storage Containment Tray to contain large spills and provides ease of cleanup. (located in bottom of cabinet)

Cat. No. 81002

Liquid Chemical Storage Cabinets shall be in an area of the laboratory with low traffic away from the main work area. It is important to segregate incompatible chemicals. Eliminate ignition sources such as open flame, hot surfaces, electrical equipment or static electricity from the Storage area. Make sure appropriate fire extinguishers and/or sprinkler systems are in the area. An eyewash and safety shower must be readily accessible to areas where liquid chemicals are stored, per OSHA 1910.106(d)(3)(I).

Note: Venting voids the U.L. listing, If applicable, as site conditions cannot be verified by U.L.

Flammable Storage Cabinets

- Doors One-piece double wall construction painted before assembly. Insulated door filler for added rigidity and quiet operation. Rubber door bumpers. Powder coated finish.
- Cabinet Exhaust can be vented out the back or through the fume hood or through a exhaust blower system
- Removable Shelf for small container Storage
- Cabinet interior bottom with a radius flange for increased strength and ease of cleaning.
- Containment Lip on front bottom edge of cabinet to hold spills
- Mobile Cabinets are available.

For Storage of Flammable chemicals, available in 18", 24", 30", 36" & 48" widths. Standard 35 1/4" high and 22" deep cabinet dimension. (as shown) U.L. 1805 Fume Hoods & Cabinets

- Solvent Storage Cabinets are specifically designed for the Storage of flammable and combustible liquids.
- Construction meets the requirements listed by UFC, OSHA and NFPA No. 30-1993 and are UL listed.
- A 2" deep liquid-tight pan covers the entire bottom of the cabinet to contain liquid leaks and spills. Two diametrically opposed vents with spark screens are provided in the back of the cabinet as well as a grounding screw.
- Cabinets are labeled: **FLAMMABLE - KEEP FIRE AWAY**
- The right hand door is equipped with a three-point latching system.

Rear view with connections for venting.

ABC Dry Chemical Fire Extinguishers

Halon Fire Extinguishers

(See page 22 for Fire Extinguisher info)

Laboratory Countertops, Sinks, and Plumbing

Countertops are available in phenolic resin (standard), epoxy resin, and stainless steel, are 24 or 30 inches deep, and can be supplied with or without back splashes. Sink and service cut-outs are fabricated as required.

Laboratory Countertops

Phenolic Resin

1. Phenolic Resin Surfaces are constructed of solid composite panels that have excellent chemical resistance and durability. Surfaces are nonporous and UV, heat, bacteria, and scratch resistant. Available in 1" thickness. color: Charcoal (sold by the lineal foot) SEFA Compliant, UL1805 Certified.

Depth	24" Deep	30" Deep
No Backsplash	Cat. No. 70118	Cat. No. 70018
With 4" Backsplash	Cat. No. 70118B	Cat. No. 70018B

Epoxy Resin

2. Epoxy Resin Surfaces & curbs are molded of a modified epoxy resin that is specifically compounded & cured to provide optimum physical & chemical resistance. Surfaces are nonporous, non-conductive, stain & heat resistant. Available in 1" thickness. color: Black. (sold by the lineal foot) SEFA Compliant, UL1805 Certified.

Depth	24" Deep	30" Deep
No Backsplash	Cat. No. 70115	Cat. No. 70015
With 4" Backsplash	Cat. No. 70115B	Cat. No. 70015B

Stainless Steel

3. Stainless Steel Surfaces are fabricated of type 304, 16 gauge steel with #3 satin finish. All corners, ends, and joints are continuous Heliarc welded and ground smooth. (type 316 stainless steel available) (sold by the lineal foot)

Depth	24" Deep	30" Deep
No Backsplash	Cat. No. 70116	Cat. No. 70016

Neutralization Tanks

Molded of one-piece, chemical resistant polyolefin, neutralization tanks are designed to dilute & neutralize laboratory waste & concentrated corrosives.

5 gallon tank
(5.5" wide x 14" deep x 20" high with 1.5" IPS inlet / outlet)
Cat. No 40222
Note: 5 gallon tank requires (1) bag of limestone.

15 gallon tank
(17.25" dia. x 15.5" H with 1.5" IPS inlet / outlet)
Cat. No 40322
Note: 15 gallon tank requires (3) bags of limestone.

Limestone
is utilized as the medium for neutralizing the hazardous waste. (50 lb bag)

Note: Limestone is not included with tank. Cat. No. 40223

Cupsinks & Traps

Oval Cup Sink

Drop-in cup sink available in polyolefin. 1.5" IPS tailpiece includes strainer.

3" x 6"	Cat. No. 40119
3" x 9"	Cat. No. 40121

Round Cup Sink

Drop-in sink available in epoxy or polyolefin. 1.5" IPS tailpiece includes strainer.

Polyolefin 6"	Cat. No. 40118
Epoxy Resin 8"	Cat. No. 40218

Polyolefin Jar Trap

Trap includes adjustable tailpiece and removable jar. 1.5" tailpiece.

Cat. No. 40220

Plumbing, Electrical, and Safety Services

The countertop service fixtures are chrome-plated. All fixtures have serrated hose connections except where noted. Color-coated service handles and hole cutouts in countertop are provided. Countertop fixtures are not factory installed. Please specify services required and the fixture location.

Countertop Laboratory Plumbing

Single Gooseneck
6" swivel gooseneck for use with foot pedal remote. 3/8" NPT. ADA compliant
Cat. No. 50110-SF

Delonized Water Gooseneck Faucet
PVC faucet for distilled water. 6" rigid gooseneck. 3/8" NPT.
Cat. No. 50043

Single Service Gooseneck Faucet
Single water, 6" swivel gooseneck. 3/8" NPT.
Cat. No. 50015 with vacuum breaker
Cat. No. 50010

Deck Mounted Mixing Faucet
Hot and cold water faucet. 6" gooseneck. 3/8" NPT.
Cat. No. 50026 with vacuum breaker
Cat. No. 50018

ADA H/C Mix Gooseneck Faucet
6" swivel gooseneck with wrist handle controls. 3/8" NPT. ADA compliant.
Cat. No. 50040

Foot Pedal Remote Control
Valves with heavy chrome plating. ADA compliant. 1/2" NPT.
Single Pedal | 50021
Double Pedal | 50020

Inline Vacuum Breaker
3/8" NPS. Dual check.
Cat. No. 51139

Aerator
Aerator for gooseneck outlet. Furnished with gasket. 3/8" NPS.
Cat. No. 50139

Aspirator Pump
Aspirator pump with 3/8" NPS male inlet.
Cat. No. 50058

Keycock
Fixture includes turret and shank connection.
Single Outlet | 50014
Double Outlet | 50014-2
Triple Outlet | 50014-3
Quad Outlet | 50014-4

Countertop Pedestal Electrical Services (UL listed)

Single Gang Outlet
Brushed cast aluminum box with stainless steel cover, surface mount. Please specify desired location of pedestal box.

Double Gang Outlet
Brushed cast aluminum box with stainless steel cover, surface mount. Please specify desired location of pedestal box.

Single Gang	Single Face	Double Face
Duplex/115 V/15a	50131S	50131D
Single/230 V/20a	50132S	50132D
GFI Duplex/115 V/20a	50135S	50135D

Double Gang	Single Face	Double Face
Duplex/115 V/15a	50031S	50031D
Single/230 V/20a	50032S	50032D

One Duplex and One Single/250 V/20a	50034S	50034D

Horizontal mount

Electrical & Data Supply Chase Anodized aluminum raceway can be supplied with a variety of electrical or data services. Can be mounted in vertical or horizontal position.

- Specify length, type of plug, quantity of plugs, type of data outlet. **Cat No. 50086**

Laboratory Safety Eye / Face / Body Wash, Safety Showers

Swing-Out Eye Wash
Deck mounted next to sink. Activates when pivoted. 1/2" NPT. Barrier free.
Cat. No. 16009

Pull-Down Eye Wash
Recessed, wall mounted (4" deep), pull-down eye wash safety station. Stainless steel. 1/2" NPT. Barrier free. **Cat. No. 93968**

Hand Held Face Body Wash
squeeze valve nozzle on 8' coiled hose and bracket. Can be used to rinse body parts while victim is sitting or lying down. Wall or hood mounted, 3/8 NPT, Barrier free.
Cat No. 16005

Laboratory Safety Shower
Cat.No. 16604
see page 27

UniFlow[®] SL AireStream Fume Hoods

High efficiency, full duty fume hood in 48", 60", 72" and 96" widths. UniFlow SL AireStream fume hoods are designed for energy savings & maximum user protection. The aerodynamic face opening with airfoil provides uniform air flow through the fume chamber. A constant volume low flow hood with Vector AireStream baffle system directs the air through the fume chamber to the bell shaped exhaust outlet with minimal turbulence. Color: Lab White

UniFlow Superstructure non-metallic construction for total chemical and corrosion resistance, superior durability and long life. Interior fume chamber one piece glass smooth, all covered corners for ease of cleaning. Unitized construction reduces weight for ease of installation. 5 year warranty.

Overall Height is 54" inches with a 48" inch high interior fume chamber.

VaraFlow Baffle System Features vector flow slots for low flow and high performance. Maintains uniform air flow thru the baffle system to bell shaped exhaust collar outlet.

Access Panel removable to access ducting connections, plumbing & electrical services from a single point electrical box, 115V/60Hz AC operation. Energy efficient vapor proof LED light fixture with polished stainless steel reflectors, and light switch on left column, all factory installed.

31" Standard Vertical Sash Height

vertical moving sash for loading & unloading of fume hood. Sash is counterbalanced and connected with coated stainless steel cables, 3/16" tempered safety glass with chemical resistant non-metallic PVC framing track and aerodynamic sash lift.

Sash Stop located at 1/2 open position to reduce air flow 50%, **Cat. No. 51651**

Full 35" Viewing Height for ease of access, unobstructed view of fume chamber, and working with tall apparatus and distillation grids. Ergonomic sash lift contoured for efficient air flow and ease of movement, standard equipment.

Angled Picture Frame Sash Opening

the aerodynamic face opening with air foil provides uniform air flow into the fume chamber and thru the Vector AireStream baffle system.

Worksurface and Base Cabinet

are included as part of the fume hood package. The worksurface is a dished epoxy resin and the cabinet is a standard two door unit 35" high with powder coat finish.

Air Flow Monitor continuously monitors face velocity air flow, comes standard with analog, digital available. Meets ANSI and OSHA requirements. Optional equipment, **Cat. No. 51403**

SL AireStream Fume Hood Cat. No. 55531 shown with optional service fixtures

UniFlow[®] SL AireStream Fume Hoods

UNIFLOW SL AIRESTREAM FUME HOOD GROUPINGS	Fume Hood Width "A"			
	48" Cat No.	60" Cat.No.	72" CatNo.	96" Cat.No.
1. UniFlow SL CAV AireStream Fume Hood: Air Bypass low flow, constant air volume hood. Dual wall unitized construction, all non-metallic corrosion and fire resistant composite fiberglass construction. Vector AireStream Baffle System and transition bell exhaust connection. Molded one-piece fume chamber with white glass-smooth surface with all covered corners. Vertical sash to be counter balanced 3/16" tempered safety glass with chemical resistant non-metallic PVC framing, track, and aerodynamic sash lift. A sash stop is installed at the 1/2 open position. Vapor proof LED light fixture and control switch are wired to a single point junction box, 115/60Hz. AC All electrical components are U.L. listed. Fume hood is U.L.1805 classified. Fume hood comes with dished epoxy resin worksurface and standard base cabinet. Standard color: Lab White	55431	55531	55631	55831
2. UniFlow SL VAV AireStream Fume Hood: Same as #1 above except equipped with variable air volume VAV restricted by-pass feature. Ducting must be connected to optional VAV exhaust system controls.	55432	55532	55632	55832
3. UniFlow SL CAV AireStream Fume Hood with Explosion-Proof Light: Same as #1 above except, equipped with explosion proof vapor proof light fixture. Class I Division II Group A B C & D, Class II Division II Group F & G, 115V/60Hz U.L. listed fixture is installed but not wired. Must be field wired to comply with codes.	55433	55533	55633	55833
4. UniFlow SL CAV AireStream Fume Hood: Same as #1 above except equipped to comply to international electrical configuration. 220V/50Hz AC Optional international electrical configuration, electrical switches, receptacles available.	55434	55534	55634	55834

Tips for Fume Hood Layout:

- Cupsinks or sinks cannot be located directly above acid or flammable Storage cabinets; unless behind the cabinet.
- Locate service fixtures 6" back from the sash.
- Service fixture access panels are located on the exterior side walls. Please specify if required on the interior side walls.
- Exhaust blowers and filters can be sized to your application, consult factory.

Fume Hood Worksurfaces & Base Cabinets

A complete line of worksurfaces and cabinets to suit any application from economical light duty to heavy acid and solvent use. Select the worksurfaces and cabinets that meet your laboratory's requirements. Standard sizes are listed below. HEMCO's technical staff can make recommendations to suit your specific needs.

(UniFlow SL hoods 30" only) Epoxy Resin, color: black, 1-1/4" thick, 3/8" dished

Cast Epoxy Resin Worksurfaces are recommended for general laboratory work where greater chemical resistance is required. Surface is dished 3/8" to contain spillage. Worksurface is cast of thermosetting epoxy resin, creating a molded solid 1-1/4" thick top which is extremely hard, abrasion and heat resistant. Tested to UL 1805 classification.

SL Size	Cat. No.	Size	Cat. No.
36"W x 30"D	20315	36"W x 36"D	20325
48"W x 30"D	20415	48"W x 36"D	20425
60"W x 30"D	20515	60"W x 36"D	20525
72"W x 30"D	20615	72"W x 36"D	20625
96"W x 30"D	20815	96"W x 36"D	20825

(UniFlow SL 30" only) Phenolic Resin, color: black, 1-1/4" thick

Phenolic Resin Worksurface are recommended for general laboratory work where high concentrations of solvent, acids and alkalis are being worked with. Work surface combines excellent chemical resistance scratch and wear resistance. Surface is flat 1-1/4" thick. Tested to UL 1805 classification.

SL Size	Cat. No.	Size	Cat. No.
36"W x 30"D	21428	36"W x 36"D	22428
48"W x 30"D	21418	48"W x 36"D	22418

Fume Hood Wall Mounted Plumbing Fixtures

Fume hood remote control service fixtures feature epoxy coated brass, chemical resistant, color-coded, serrated hose connections, and 3/8" NPT brass valves with rod and handle assembly. Plumbing fixtures are factory installed on hood, they can be pre-plumbed if specified. Please specify service required, fixture location, and inside or outside service access panels. Conforms to ANSI Z21.15.

Service Fixture Color Code Chart	Green - Cold Water	Red - Hot Water	Blue - Gas	Orange - Air
	Yellow - Vacuum	Brown - Nitrogen	Black - Steam	White - Deionized Water

Service Set of Two (specify left or right mounting)
Two remote controlled service fixture set. Color-coded index buttons with matching color-coded serrated tip. Specify service required. Epoxy coated brass.
Cat. No. 50121-FS

Service Set of Four (specify left or right mounting)
Four remote controlled service fixture set. Color-coded index buttons with matching color-coded serrated tip. Specify service required. Epoxy coated brass.
Cat. No. 50141-FS

Service Set of Six (specify left or right mounting)
Six remote controlled service fixture set. Color-coded index buttons with matching color-coded serrated tip. Specify service required. Epoxy coated brass.
Cat. No. 50161-FS

DI Faucet
Pure water 6" rigid PVC gooseneck.
Cat. No. 50019

DI Faucet
Pure water 6" swivel tin-lined gooseneck. Epoxy coated brass.
Cat. No. 50022

Gooseneck PVC Service Fixture
Wall mount, no valve, constructed of PVC.
Cat. No. 51110

Service Fixture
Cold water, remote controlled epoxy coated brass turret.
Cat. No. 50012

Water Faucet with Vacuum Breaker
Cold water 6" swivel gooseneck. Epoxy coated brass.
Cat. No. 50023

Water Faucet with Vacuum Breaker
Cold water remote controlled 6" swivel gooseneck. Turret & gooseneck are epoxy coated brass. **Cat. No. 50113-CW**

Water Faucet
Cold water remote controlled 6" swivel gooseneck. Turret and gooseneck are epoxy coated brass.
Cat. No. 50112-CW

Service Fixture
Remote controlled single service outlet. color-coded index buttons with matching color coded serrated tip outlets.
Cat. No. 50013

Base Fixture
Deck or wall mount, 3/8 NPT remote, no valve. PVC.
Cat. No. 51013

PVC Lab Turret
Deck or wall mount, 3/8 NPT, no valve, PVC.
Cat. No. 51012

Mix Faucet
Hot and cold remote controlled 6" swivel gooseneck. Turret and gooseneck are epoxy coated brass.
Cat. No. 50102

Mix Faucet
Hot and cold water remote controlled turret. Turret is of epoxy coated brass.
Cat. No. 50101

High Flow Water Valve, Straight Pattern
Ball valve construction with quarter turn open / close, used for supply and return connections.
Cat No. 51023

Single Keycock
Single flange mounted needle valve, keycock with integral flange and shank connection. Epoxy coated brass. 3/8" NPT with lock nut.
Single Cat. No. 50025
Double Cat. No. 50125

Aspirator
3/8" NPS male inlet
Epoxy coated brass.
Cat. No. 50058

External Mounted Vacuum Breaker
Breaker with 3/8" IPS inlet and outlet. Chrome plated brass. **Cat. No. 50044**

Fume Hood Electrical Services

Electrical services are UL, CSA & CE listed. They come factory installed, wired to a single point junction box when ordered with fume hoods. Services must be wired to comply with local codes.

Fume Hood Electrical Services (UL)

Duplex Receptacle
115V single phase receptacle. Installed on front column of fume hood. Includes junction box and cover plate. UL listed.

amps	Cat. No.
15 amps	50029-1
20 amps	50029-2

Single Receptacle
230V single phase receptacle. Installed on front column of fume hood. Includes junction box and cover plate. UL listed.

amps	Cat. No.
15 amps	50030-1
20 amps	50030-2

GFI Duplex
115V consists of combination ground fault interrupters, 3-wire polarized grounded. Includes junction box & cover plate. UL listed.

amps	Cat. No.
15 amps	50048-1
20 amps	50048-2

Data Port
Cat 6, 10 gigabit ethernet, (2) port fixture. Installed on front column. Cabling not included.

Cat No. 50053

Light Switch (standard)
115V/15 amps. Includes junction box and cover plate. UL listed.

Cat. No. 50028-1

Blower Switch with Pilot Light
Includes junction box and cover plate. UL listed.

volts/amps	Cat. No.
115V 15 amps	50027-1
230V 20 amps	50027-3

Blower Switch
Mounted in a single gang receptacle box with face plate. Factory mounted not wired. Includes thermal overload protection. Double pole switch for up to 1 HP, single phase, 60 Hz 115V 50 Hz, 230V AC motors. UL listed.

Cat. No. 50050

Service Port Pass-Through
Convenient port allows cords, tubes, or cables to pass to and from the hood.

Cat. No. 50100

Fume Hood Vapor Proof Light Fixtures (UL)

Vapor-Proof Light

Factory installed. Accepts bulb up to 150w, 115V, & LED UL listed, (bulb not included) Standard on CE, Canopy, Universal and EcoFlow hoods.

Cat. No. 50035

Vapor Proof LED Light Fixture

LED fixture with Stainless steel reflector, (2) tube, 115V, UL listed. (LEDs included) LED has a 50,000 hour average life span. Standard on SE and LE Fume hoods.

24 inch.....	Cat. No. 51124
36 inch.....	Cat. No. 51136
48 inch.....	Cat. No. 51148

Fluorescent Lighting

T-5 fixture with Stainless steel reflector, (2) tube, 115V/230V tubes changed from the outside. (fluorescent tubes are included) UL listed. Optional on SE and LE Fume hoods.

24 inch.....	Cat. No. 50224
36 inch.....	Cat. No. 50236
48 inch.....	Cat. No. 50248

Fume Hood Explosion Proof Light Fixtures and Services (UL)

Explosion-Proof Light Std Class I Div II

For use in hazardous locations. Gray, two-coat epoxy finish with easily removed prismatic globe. Factory mounted, not wired. Accepts compact fluorescent or LED, (bulb not included) 115V /230V UL listed. Class I Div II Group A, B,C,D Class II Div II Group F & G

Cat. No. 50034

Explosion-Proof Fixture Class I Div I

For use in hazardous locations. Gray, two coat epoxy finish with easily removed prismatic globe. Accepts compact fluorescent or LED, (bulb not included) 115V/230V. Factory mounted, not wired. UL listed. Class I Div I Group C, D, Class II Div II Group E, F & G

Cat. No. 50038

Explosion-Proof Fluorescent Lighting Class I Div I

fixture is (2) tube, 115V/230V with tubes changed from the outside. UL listed. (fluorescent tubes are included)

24 inch..... Cat. No. 50077
48 inch..... Cat. No. 50078

Explosion-Proof Switch Class I Div I or II

For use in hazardous locations. Surface mount type with cast aluminum housing. Specify 115V/20 amp or 230V/20 amp. UL listed.

Cat. No. 50036

Explosion-Proof Plug Class I Div I or II

Adaptable for use with all receptacles. 3-pole, 2-wire, Specify 115V/20 amp or 230V/20 amp AC. Not installed at factory. UL listed.

Cat. No. 50039

Explosion-Proof Receptacle Class I Div I or II

For use in hazardous locations. Surface mount type with aluminum housing, 3-pole, 2-wire, Specify 115V/20 amp or 230V/20 amp. Not installed at factory. UL listed.

Cat. No. 50037

Explosion-Proof Ground Fault Interrupter

For use in hazardous locations. Factory sealed GFI is designed to interrupt a circuit when a ground fault is detected. 115V 60 Hz, 20 amp. Not installed at factory. UL listed.

Cat. No. 50104

Fume Hood International Electrical Services (CE)

Continental European Socket with cover cap

Type: CEE7
color: gray
Rating 250V/16 amp, installed at factory.

Cat. No. 50004

Indian / South Africa Socket ISA

Type: BS546
color: white
Rating 250V/15 amp, installed at factory.

Cat. No. 50006

United Kingdom / Ireland Shuttered Socket

Type: BS1363
color: white
Rating 250V/13 amp installed at factory.

Cat. No. 50007

Continental European Panel Mount Socket

Type: CEE7
color: white
Rating 250V/15 amp installed at factory.

Cat. No. 50008

Fume Hood Sink and Plumbing Services

A complete line of sinks in epoxy resin, polypropylene, and stainless steel. We also offer a wide variety of plumbing accessories including neutralization tanks and bead baths. HEMCO welcomes the opportunity to quote your special applications. Additional sink sizes are available. Contact factory for more details. Conforms to ANSI Z21.15.

Epoxy Resin Fume Hood Laboratory Sinks

Epoxy Resin Sink Laboratory sink made of chemical and corrosion resistant epoxy resin. Drop-in sink. color: black. Please specify desired location. Includes sink stopper & drain outlet.

	Size	Cat. No.
1	9" x 6" x 6" deep	42021
2	16" x 12" x 8" deep	42022
3	18" x 15" x 11" deep	42026
4	24" x 16" x 8" deep	42027

Polypropylene Fume Hood Laboratory Sinks

Polypropylene Sink Laboratory sink made of chemical resistant heavy duty polypropylene. Drop-in sink. color: black. Please specify desired location. Includes drain outlet.

	Size	Cat. No.
1	12" x 8" x 8" deep	72041
2	14" x 10" x 6" deep	72043
3	18" x 15" x 12" deep	72045
4	28" x 20" x 9" deep	72048

Stainless steel Fume Hood Laboratory Sinks

Stainless Steel Sink Laboratory sink made of one-piece, type 304 stainless steel and polished to a No. 4 satin finish. Drop-in sink. Underside is sound deadened to reduce drumming. Specify location. Includes drain outlet.

	Size	Cat. No.
1	12" x 12" x 7.5" deep	42031
2	16" x 16" x 7.5" deep	42032
3	16" x 22" x 7.5" deep	42033
4	16" x 28" x 7.5" deep	42034

Fume Hood Cup Sinks & Plumbing Fixtures

Cupsink 6" Diameter

Cupsink is made of polyolefin with 1.5" IPS tailpiece and outlet strainer.
Cat. No. 40118

Oval Cup Sink

Drop-in cup sink available in polyolefin. 1.5" IPS tailpiece includes strainer.

3" x 6"	40119
3" x 9"	40121

Oval Wall Cupsink 6" x 3"

Cupsink is made of polyolefin with 1.5" IPS tailpiece and outlet strainer.
Cat. No. 40419

Jar P Trap

P-trap includes adjustable tailpiece and removable jar. with 1.5" IPS tail piece.
Cat. No. 40220

P Trap

P-trap is made of polypropylene with 1.5" IPS tailpiece.
Cat. No. 40120

Neutralization Tanks

15 gallon tank

(17.25" dia. x 15.5" H with 1.5" IPS inlet / outlet)

Cat. No 40322

Note: 15 gallon tank requires (3) bags of limestone.

Molded of one-piece, chemical resistant polyolefin Neutralization tanks are designed to dilute and neutralize laboratory waste and concentrated corrosives.

5 gallon tank

(5.5" wide x 14" deep x 20" high with 1.5" IPS inlet / outlet)

Cat. No 40222

Note: 5 gallon tank requires (1) bag of limestone.

Limestone

is utilized as the medium for neutralizing the hazardous waste. (50 lb bag)

Note: Limestone is not included with tank.

Cat. No. 40223

Apparatus Grids and Fire Extinguishers

Distillation apparatus grids are designed to mount small apparatus and glassware in the interior of the fume hood, maximizing the work area. Grids are available in aluminum, stainless steel, or fiberglass to meet specific needs. Mounting options: 1. Grids can be mounted to the side walls of the fume hood, 2. When more strength is required, grids can mount to both the sidewalls and the worksurface, consult factory for details.

Fume Hood Apparatus Grids

Fume hood with apparatus grid installed

Aluminum Apparatus Grid				
Fume Hood Width	48"	60"	72"	96"
Grid Width for Hood as Installed	36"	50"	62.5"	86.5"
Aluminum Rod Assembly 1/2" dia.	50141	50151	50161	50181

- All components are machined from solid aluminum bar stock.
- All aluminum lattice rod components are furnished with a satin (brushed) finish.
- Backing plates for hood wall and mounting screws for flanges are not included.

Stainless Steel Apparatus Grid				
Fume Hood Width	48"	60"	72"	96"
Grid Width for Hood as Installed	35"	46"	56"	81"
Stainless Steel Assembly 1/2" dia	50142	50152	50162	50182

- Stainless steel components offer superior strength and corrosion resistance for even the most demanding applications.
- All components are machined from Type 316 stainless steel bar stock and polished to a satin finish.
- Backing plates for hood wall and mounting screws for flanges are not included.

Non-Metallic Composite Apparatus Grid				
Fume Hood Width	48"	60"	72"	96"
Grid Width for Hood as Installed	35"	46"	56"	81"
Fiberglass Rod Assembly 1/2" dia.	50143	50153	50163	50183

- All rod components are white fiberglass.
- All connectors are molded in black nylon for strength and chemical resistance.
- Backing plates for hood wall and mounting screws for flanges are not included.
- Half open style clamps, facilitate adding or removing rods from existing assembly.

Fire Extinguishers for Flammable Hazards in flammable cabinets vented through fume hood

Foremost: Fume hood fires must be extinguished promptly, failure to do so could result in loss of life and valuable equipment & processes. In case of a fire inside of a fume hood. 1. Lower the sash into the closed position. 2. Pull the manual front mount discharge cable to activate the fire extinguisher. 3. Shut off the fume hood blower on the fume hood, and any remote exhaust blowers that are connected. 4. Shut off any utility services that could feed a fire. Fire extinguisher activation occurs at 165° Fahrenheit. These are recommendations, contact your laboratory safety officer for guidelines.

ABC Dry Chemical Fire Extinguishers

1. Fire Extinguisher with automatic activation at 165° Fahrenheit.
 - With dry chemical for class ABC fires, 16 Square feet.....Cat No. 53030

Halon Fire Extinguishers

2. Fire Extinguisher with automatic activation at 165° Fahrenheit.
 - With Halon, up to 50 Cubic feet.....Cat No. 53050
 - With Halon, 125 Cubic feet.....Cat No. 53125
- Manual Discharge Cable Kit.....Cat No. 53007

Manual discharge cable kit **Note:** Larger hoods may require (2) or more extinguishers, based on interior cubic dimensions.

HEMCO Fume Hood Materials & Chemical Resistance Chart

UniFlow Fume Hoods are constructed of white composite Fiberglass Reinforced Polyester (FRP) material. FRP is an excellent general purpose material for fume hood construction.

- Superstructure features unitized dual wall construction with integral one-piece fume chamber for total chemical resistance, non-sparking construction, for hazardous locations.
- UniFlow HiPel FRP Composite construction is UL 1805 Classified for Laboratory Fume hoods and cabinets.
- HEMCO HiPel FRP Composite conform to NFPA 45 for products used in laboratories.
- To provide for the best airflow performance through the fume chamber, any heat generating equipment should be elevated 2" to 3" above work surface and 4" to 6" away from side walls and rear baffle system, and at least 6" away from the sash opening.

Chemical resistance of HEMCO's most widely used FRP composite construction, and other liner material options.

Tables & Worksurfaces

Standard Tables for Unitized Enclosures

- Available in 4', 5', 6' & 8' widths. Depths of 30" & 36".
- Tested to 2000 lb. load capacity.
- Adjustable telescoping 2" square steel legs adjust to 28", 30", 32" & 34" heights.
- Sturdy dual locking bolts on each leg.
- Height adjustable leveling legs on all four legs.
- Standard color: Lab White, (optional colors are available as required)
- SEFA Certified
- Black Phenolic Worksurface (not included)

Standard Lab Tables

Shown with optional locking casters for mobility, and worksurface

T - Frame Mobile Tables

The table is adjustable from 30 to 36 inches in height. It is of welded steel construction with a phenolic resin work surface.

Mobile table is an ideal lab cart and can accommodate:

- MicroFlow I, II & III Workstations
- Demonstration Hoods
- VSE Vented Safety Enclosures
- Table Top Fume Hoods
- Welded all steel construction, chemical resistant epoxy powder coated finish color white.
- (2) locking casters & (2) Non-locking Casters included
- Phenolic resin worksurface

Mobile Table 36" wide	50318
Mobile Table 48" wide	50418

Energy Savings Ventilation Recommendations

A comparison of two fume hoods below is based on a designed 12" high operating sash height with sash management and a full open sash height without sash management. By maintaining a lower operating height, energy can be conserved, material costs saved, and user safety enhanced. Sash Management can SAVE 57% on fume hood operating cost.

Energy Savings

Annual cost to operate \$8190.00

1. UniFlow 72" CAV bypass fume hood **WITHOUT** sash management requires 1170 CFM to maintain 100 FPM (face velocity) with the sash fully open. At an average of \$7.00 per CFM, the annual cost to operate this fume hood would be \$8190.00

2. UniFlow 72" CAV bypass fume hood **WITH** sash management only requires 500 CFM to maintain 100 FPM (face velocity) with operating height at 14". At an average of \$7.00 per CFM, the annual cost to operate this fume hood would be \$3500.00

Annual cost to operate \$3500.00

Total Energy SAVINGS = \$4690.00 per year

Equipment Savings

Based on 20' of ducting, (1) 90° elbow, stack outlet, and exhaust blower

UniFlow 72" CAV bypass fume hood **WITHOUT** sash management would require 12" diameter ducting to handle the volume and duct velocity at \$200.00 per foot.

UniFlow 72" CAV bypass fume hood **WITHOUT** sash management an exhaust blower designed to maintain 100 FPM (face velocity) would require 1170 CFM @ 0.75" w.g. (static pressure) with a 10" diameter inlet and 1/2 hp motor at \$3720.00

UniFlow 72" CAV bypass fume hood **WITH** sash management would only require 8" diameter ducting to handle the volume and duct velocity at \$143.00 per foot.

UniFlow 72" CAV bypass fume hood **WITH** sash management an exhaust blower designed to maintain 100 FPM (face velocity) with sash at 14" operating height, would only require 500 CFM @ 0.75" w.g. (static pressure) with a 9" diameter inlet and 1/4 hp motor at \$3264.00

Total Equipment SAVINGS ducting & blower = \$1617.00

Importance of Duct Velocity

Duct Velocity is important to the safe ventilation of laboratory fumes & particulate, 1200 to 1500 FPM (duct velocity) is recommended. A 72" fume hood with 1170 CFM (for full sash opening) will have a 12" diameter belled outlet duct connection & will maintain 1400 FPM duct velocity. A 72" fume hood with 500 CFM (for 12" sash opening) will have an 8" diameter belled outlet duct connection & will maintain 1400 FPM duct velocity for over a 50% reduction in volume.

Importance of Room Air Changes per Hour

10-12 Air Changes per Hour is typical to a laboratory and in some cases the fume hood not only exhausts hazardous fumes but serves as the general ventilation of the lab. The lab should always be under negative pressure; thus 10% of the exhaust should come in from the corridor under or around the door. For example, a 12' x 25' x 9' high room, at 2700 cu ft, would require approximately 450 CFM. With the hood at 500 CFM and 10% of that coming from the corridor, the minimum supply in the room would be 450 CFM. However if a greater amount is brought in, there would need to be general exhaust from the room to prevent the room from being pressurized.

Make-Up Air, Considering that a fume hood exhausts a large amount of air from the lab space, it is necessary to ensure that there is sufficient air supply to the lab, yet still maintaining a negative air pressure to the surrounding area.

Because of the additional resistance in the duct system, the static pressure of in-line filtration would need to be calculated when sizing the exhaust fan.

Filtration, Depending on the contaminant, an inline HEPA or carbon filter may be necessary to prevent pollution to the outside environment.

Sash Stop

located at 1/2 open to reduce air flow 50%, Cat. No. 51651

Request your Lab Ventilation Systems Brochure: info@hemcocorp.com

Fume Hood Ventilation and Duct Design

Ductwork connected to fume hoods may be arranged in a variety of patterns depending on requirements. Generally, the best exhaust system involves the shortest duct length and the fewest elbows. Duct size, length, and number of elbows affect static pressure loss and blower efficiency. Ideally, each fume hood should have its own ducting and blower to maximize hood flexibility and reduce danger of back draft from other hoods.

Common or manifold ductwork designs can be used, provided duct and blower have been sized properly. In these designs, individual hood dampers are recommended to balance the system. Hood users must be aware of how different hood exhaust fumes will react when mixed in the ductwork. Rigid PVC ductwork is recognized as an excellent fume hood exhaust duct material. The smooth interior surface reduces static pressure loss and chemical waste build up, and PVC is extremely resistant to a wide variety of reagents. For some applications flexible PVC lined duct provides adequate service and can significantly reduce installation costs. When planning exhaust ducting, duct size, length, number of bends, and exhaust material must be considered. Consult HEMCO for Lab Ventilation Solutions.

Hood Operation

- Consult Lab Safety Officer for correct use of fume hood.
- Hoods should not be used as laboratory storage space. Unnecessary material or unused bottles and flasks can block exhaust openings and interfere with hood performance.
- OSHA requires a fume hood be equipped with an Air Flow Monitor to track air flow velocities and warn operator of potentially dangerous low air flows due to damper, blower failure, blockage of ductwork system, or extreme sash opening height.

Air Flow Monitors Note: OSHA recommends air flow alarms to be installed on all fume hoods

Air Flow Monitor Analog

Continuously monitors face velocity air flow of fume hood. Select and calibrate at desired FPM velocity set point. If the hood face velocity falls below set point, an audible alarm sounds and a visual red indicator light appears. Air flow alarm is factory installed or can be field installed, 115/60Hz AC. Cat. No. 51403

Air Flow Monitor with Digital Display

Continuously monitors face velocity air flow of fume hood. A digital display of face velocity in m/sec or FPM that indicates safety reading with an audible alarm. Push button calibration and 3 programmable input/output relays. Factory installed or can be field installed. Cat. No. 51410

Air Flow Monitor Intrinsically Safe

For applications where the fume chamber is classified but the surrounding lab space is not. Continuously monitors face velocity air flow of fume hood. If the hood face velocity falls below set point, an audible alarm sounds and a visual red indicator light appears. Factory installed or can be field installed. Cat. No. 51404

Canopy Hoods

Canopy hoods are designed to collect and exhaust corrosive vapors, heat, steam, and odors when mounted over areas with water baths, hot plates, or portable equipment. Standard color: Lab White

Wall Canopy Hoods (FRP or stainless steel, Includes wall mounting kit) (custom sizes available)

Side Wall Panel
(fiberglass or stainless steel)
kit includes one wall panel
and hardware.
Cat. No. 23000

Rear Wall Panel
(consult chart for Cat.No.)

**Vapor Proof Light
& Switch Cat. No. 50035**

**Blower Switch 115V/15A
Cat. No. 50028**

Type 304 stainless steel

Corner Canopy Hoods (FRP, Includes wall mounting kit)

Side Wall Panels (fiberglass) 36" h X 25" w, kit includes one wall panel and hardware
Cat. No. 23006

Rear Wall Panels (2) required
Qty (1) 36" high X 45" wide
Cat. No. 23056

Vapor Proof Light & Switch Cat. No. 50035

**Blower Switch 115V/15A
Cat. No. 50028**

Corner Composite Resin Worksurface Gray, Comes dished to contain spillage.
Cat. No. 13503

Corner Table Features White welded steel construction. **Cat. No. 13502**

Corner Canopy (includes mounting kit, to install canopy to two adjacent walls) **Cat. No. 13000**

Laboratory Emergency / Shower Decontamination Booths

Full body emergency shower & eye / face wash, both with immediate response activation handle.

Durable one-piece seamless fiberglass construction with glass smooth white surfaces and covered corners for ease of clean-up.

Emergency showers available with translucent frosted strip curtains, which provides for easy access into booth, while containing contaminated water splash.

Stainless steel Grab bars located on right & left sides to support victim and rescue personnel during decontamination, included.

Plumbing is provided, for installation by local certified plumber. Plumbed to single point 1.25" IPT. connection. Tempered warm water supply connection 20 GPM water supply is required.

Raised fiberglass deck with self draining containment basin, and 2" diameter drain outlet located on either the bottom or rear of unit.

Industrial Applications
Emergency Drench Shower Booth
 unit is equipped with pull rod activated overhead drench shower and rear wall mounted eye/face wash.
Cat No. 16601

Laboratory Applications
Emergency Drench Shower Booth
 same specs as above except with finished exterior side panels.
Cat No. 16604

Cat. No. 16601
 For Industrial Applications
 shown above

Note: OSHA & ANSI require that emergency shower is to be located within 10 seconds walking time from the hazardous site location.

Overhead Drench Shower

Shower unit features 10" diameter plastic head and 1" IPS brass "stay open" valve with rigid pull rod and handle. **Cat. No. 16088**

Alarm Horn & Light
 Audible warning sound when system is activated by flow switch. Top mounted visual warning light when system is activated.
Cat. No. 16680

Eye/Face Wash

Wall mounting unit features two large plastic heads, push plate operated "stay open" ball valve. 1/2" IPS inlet, and 1.25" IPS drain. **Cat. No. 16006**

Eye and Face Wash Options

Hand Held Body Wash
 Squeeze valve nozzle on 8' coiled hose and bracket. Can be used to rinse all body parts while victim is sitting or lying down. Wall or hood mounted, 3/8 NPT, barrier free.

Cat No. 16005

Swing-Out Eye Wash

Deck mounted next to sink. Activates when pivoted. 1/2" NPT. Barrier free.

Cat. No. 16009

Hand Held Eye/Face & Body Wash

Mounted on the front side-wall of the fume hood. Includes 8' hose and surface escutcheon. 3/8" NPT. barrier free.

Cat. No. 93966
