

MODULAR LABS & CLEANROOMS

Sized to suit your space requirements, pre-engineered for prompt on site assembly. Equipped with HVAC system, lighting & electrical service to specs. HEPA filtered supply air to suit your modular clean lab applications.

HEMCO pre-engineered modular construction for prompt on-site assembly to meet lab space requirements, easily expanded and relocated to suit future Lab Planning needs providing space and energy savings, Now and in the future.

Tissue Culture Modular Clean Lab, Class 10,000,

Hazardous Safety Modular Clean Lab, HEPA in-HEPA out

- Where critical levels of cleanliness must be maintained, HEMCO UniLab pre-engineered modular system offers a cost-effective alternative to conventional construction while providing quality, durability and modular clean lab performance.

- HEMCO UniLab Modular Clean Lab modulares are movable and expandable and to provide years of usability and versatility.

- HEMCO UniLab Modular Clean Lab wall systems can interface with the modular clean lab floor, ceiling and mechanical components to provide a clean workspace that maintains optimum airflow, pressure, temperature, humidity and cleanliness.

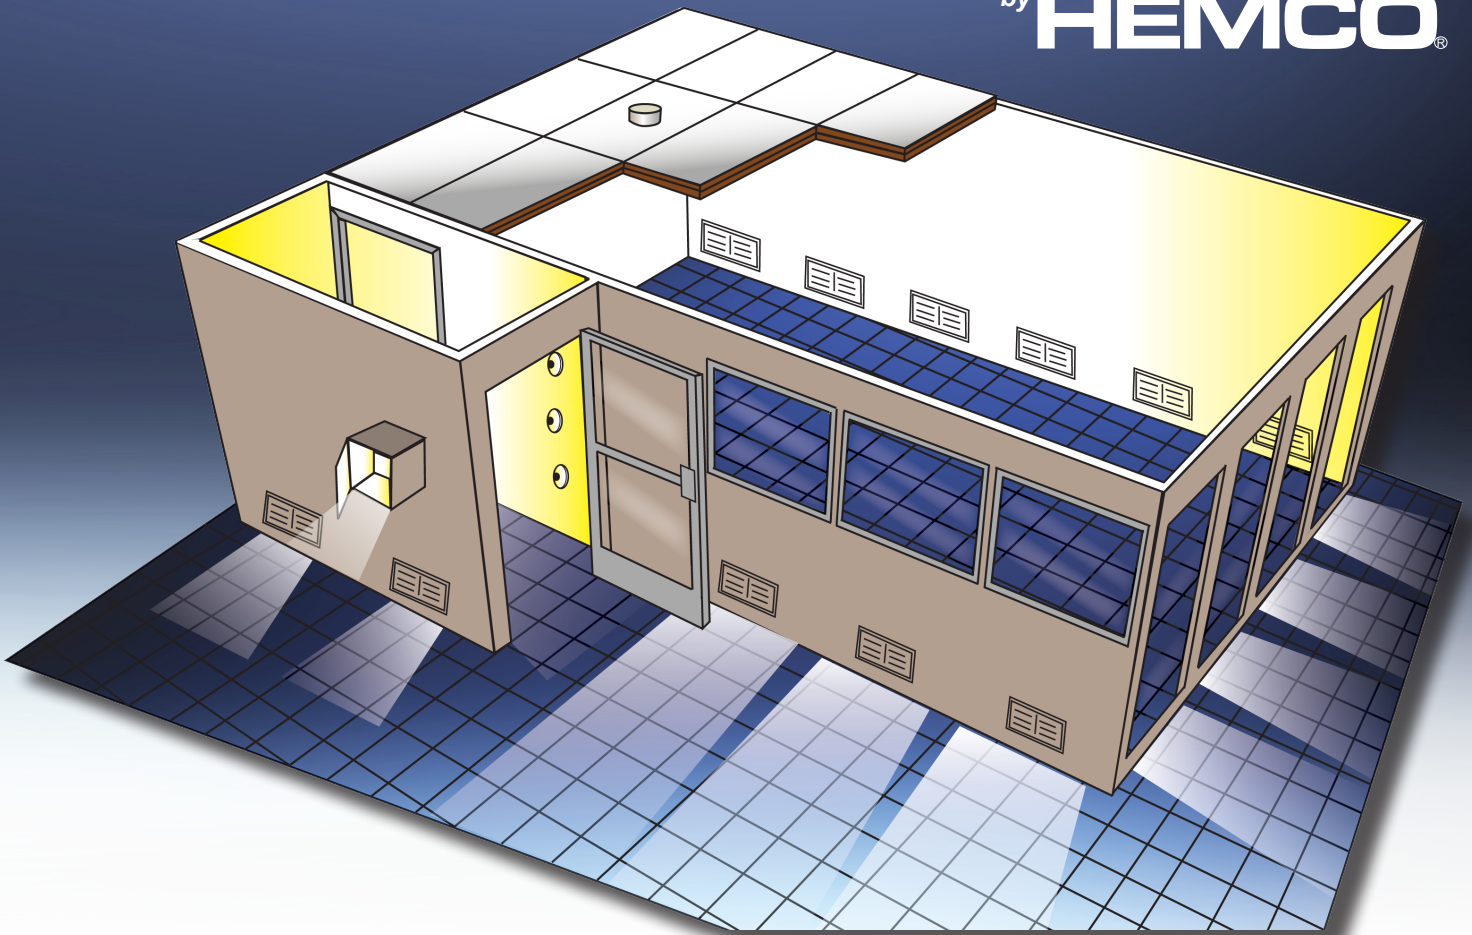

- HEMCO UniLab Modular Clean Labs can also be free standing structures, independent of the surrounding area. Rooms can be engineered to meet special size requirements.

Quality Control Laboratory

- At HEMCO, we understand your needs. Modular construction allows fast, easy installation as well as design flexibility to meet your changing needs without sacrificing quality.

- HEMCO UniLab Modular Clean Lab systems are built to your exact specifications to ensure optimal performance. Pre-engineered modular design minimizes construction costs and delays.

Clean Lab, Class 100, with airlock

**Weighing / Dispensing
Modular Clean Lab,
Class 10000, with filtered airlock**

Calibration Clean Lab

CONSTRUCTION FEATURES

- Wall and ceiling panels are chemical resistant, smooth and non-porous for easy cleaning and decontamination. Panel surfaces can be constructed of fiberglass, stainless steel, coated steel or aluminum.
- Convenient access to HEPA filters and lighting allows them to be serviced from inside the room.
- Special airlocks, gowning areas and pass-throughs can be designed into the modular clean lab.

CONCEPT TO COMPLETION

- HEMCO's experienced technical staff will gladly assist in the design and engineering of your clean room from concept to completion.
- Technical staff will work closely with you to answer questions or suggest solutions, helping to develop a modular clean lab to your exact specifications. Visit our website at www.hemcocorp.com to request a HEMCO Modular Clean Lab Specification Planner.

Quick Ship UniLab Modular Clean Labs

HEMCO UniLab Modular Clean Lab Room Structures are innovative, pre-engineered modular laboratory workspaces with HEPA filtered supply air, built to your exact process, size and design requirements, for ventilation and safety.

6' X 8' QC Lab w/base floor

MODULAR HEPA CLEAN LABS AND APPLICATIONS

- **Industrial Quality Control Laboratory**
- **Hazardous Materials Testing**
- **CMM/Calibration Lab**
- **Designated Control Rooms**
- **Additional Lab Space**

As technologies change, companies need facilities that can immediately be put into use or quickly adapt with a minimum amount of installation, time, and cost.

The UniLab Modular Clean Lab features a pre-engineered modular wall panel system that is a cost effective and time efficient alternative to traditional construction. It gives you a fully equipped, high quality enclosure that is easily expanded or relocated as needs change. Determine where the room should be located, assemble the ModuLab, connect services and start your process.

The UniLab Modular Clean Lab can fit a wide range of applications. Wall panel options are available to meet thermal, chemical resistance, sound, and fire control requirements. Room roof panels can offer load bearing capacity and suspended ceiling systems are available for pressurized overhead supply plenums.

UniLab Modular Clean Labs can be shipped knocked-down to fit through a standard doorway for easy on-site erection. If desired, it can be shipped pre-assembled for turnkey operation complete with laboratory fume hoods, furniture, and all component equipment to meet your laboratory requirements.

You can detail your specific requirement on our convenient specification planner. Request an Innovative Modular Labs and Rooms catalog at www.HEMCOcorp.com.

SPECIFICATIONS

ROOM CONSTRUCTION FEATURES: wall panels are Class A and are mounted into a clear anodized aluminum framing. Standard wall panels are 48" w x 120" h x 3" thick and are constructed with a foam core sealed between 1/2" gypsum and surfaced with chemical resistant composite resin panels with smooth white finish. Available with optional Room.

T-GRID CEILING SYSTEM: 1-1/2" Aluminum ceiling grid with white painted finish positioned 8' above floor. Includes all connectors, suspension hardware to hang from corrugated steel roof deck.

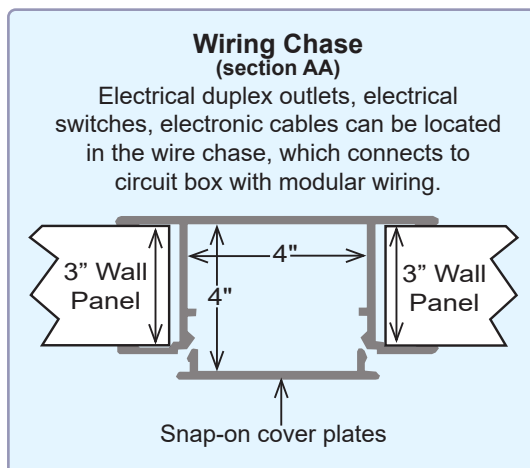

MYLAR CEILING PANELS: have sealed edges for spaces not occupied by fan filter units or light fixtures.

ENTRY DOOR: (1) 36" W X 80" H Door with viewing window, passage lever and hinges & lock.

WINDOWS: Nominal 46" W X 39" H, 1/4" tempered glass, mounted in an anodized aluminum frame. (optional windows can be added to meet your specs)

LIGHTING: LED 2' X 4' panel light fixtures, ceiling mount, 115V.

SINGLE-PASS DESIGN: Ambient surrounding air is drawn into the Clean Room Fan Filter Units at the ceiling level. The filtered air passes into the clean lab and is transferred out of the room through either the fume hood or general exhaust grills. Room is clean but under slight negative pressure.

HEPA FILTERED SUPPLY AIR: 2' X 4' Fan Filter units, Module features a 99.99% efficient @ 0.3 micron HEPA filter with, 90 FPM @ initial 0.47 w.g., 115v low watt A/C, 60Hz 1ph, includes prefilter, on/off/variable speed control, powder coated steel housing.

CLEAN AIR IN-LINE CARBON FILTRATION EXHAUST AIR: Filters are loaded with virgin coconut activated carbon to efficiently absorb organic solvents and acid fumes. The filter pack housing features a hinged access door with gaskets and spring latches for convenient filter changes.

EXHAUST BLOWERS: Standard (STD) belt drive steel blower and impeller wheel are epoxy coated for superior chemical resistance. Explosion-proof blowers (EXP) have epoxy coated, non-sparking aluminum impeller wheel. V-belt drive and adjustable pulleys permit field balancing.

Plan View Room #1 Cat. No. 80812 (12' X 8' X 10')

Room 1 includes: laboratory base cabinets, worksurfaces (black). Request a tech data sheet for room specifications. Maximum Occupancy 1-2 people.

UniFlow LE AireStream Laboratory Fume Hoods

UniFlow LE AireStream Hood Cat. No. 35663 shown with factory installed phenolic resin worksurface, base cabinet and fixtures.

High efficiency, full duty fume hood in 48" and 72" widths. UniFlow LE AireStream Fume Hoods are low flow constant volume for energy savings & maximum user protection. Requires Remote Exhaust Blower. Hood is U.L.1805 classified.

Phenolic Resin Worksurface 1 1/4" thick, dished, supplied and factory installed to bottom of hood.

Optional sizes available to your specs.

VaraFlow Air Bypass low flow, constant air volume hood. Dual wall unitized construction, all non-metallic corrosion and fire resistant composite construction. Molded one-piece fume chamber with white glass-smooth surface with all covered corners.

Vector AireStream Baffle System and bell shaped exhaust collar.

Sash to be counterbalanced, 3/16" tempered safety glass with chemical resistant non-metallic PVC framing, track & aerodynamic sash lift.

Sash Stop at half open for energy efficiency and user protection. A sash stop is installed at the half open position.

28" Vertical Sash Height provides ease of access for apparatus set-up in fume chamber. Standard Sash. 32" Viewing Height interior fume chamber with 24" interior reach in depth.

Explosion-Proof Light Std Class I Div II For use in hazardous locations. Gray, two-coat epoxy finish with easily removed prismatic globe. Factory mounted, not wired. Accepts compact fluorescent or LED, (bulb not included) 115V /230V UL listed. Class I Div II Group A, B,C,D Class II Div II Group F & G

UniLine Laboratory Casework Construction (SEFA 8 Compliant)

UniLine Casework is constructed of welded 18 gauge steel. Powder coat finish is environment friendly, attractive and long lasting, color: Lab White. Modular design allows for simple field conversion from inlet to overlay, door and drawer re-configurations and hardware component changes. Casework is tested independently to be SEFA 8 load bearing capacity compliant.

Drawer Bodies constructed of 20 gauge steel. 18 gauge drawer suspension with full extension ball bearing drawer slide. File drawer suspension available in both 100 and 150 lb capacity. Exterior is urethane powder coated steel, for chemical and abrasion resistance.

Doors double wall construction with 20 gauge reinforcing channel (1) per door. Rubber door bumpers (4) per door. Five knuckle hinges (2) per door. Nylon roller catch (1) per door. Urethane powder coated steel. Manual, self closing.

Cabinet Interior Full length & width adjustable 20 gauge steel shelf for maximum storage. Zinc plated adjustable steel shelf clips. Powder coated finish for chemical resistance. 18 gauge full height removable access panel. Color: Lab White

epoxy, stainless steel and phenolic worksurfaces available

Recessed Toe Space promotes laboratory cleanliness. Cabinet base lower corner reinforcing gusset with 0 to 2-1/2" zinc leveling bolts on (all four corners). Cabinet height adjustable from 35" to 37". 12 gauge steel corner gusset (4) each cabinet.

Laboratory Furniture Groupings

UniLine design incorporates our most popular casework groupings to meet your laboratory needs. Welded steel with chemical resistant, epoxy powder coat finish, and 1" thick phenolic resin countertops, 4" high backsplashes, and flush ends standard. Standard height 36", ADA height 34", and sitting height 28" options are available. Standard color: Lab White. (optional colors are available as required) Groupings can be supplied with optional Fume hoods.

Atlantis Grouping

Atlantis Grouping provides basic lab storage & a versatile work area. Cabinet grouping includes 3 standing height cabinets with rear filler panels on both ends, phenolic resin worksurface 36" high, with 4" high back splash. Includes 16" X 12" X 8" sink and H/C gooseneck faucet.

ADA

Freedom (ADA) Grouping Option

When ADA requirements are necessary, the UniLine Freedom Grouping option allows you specify any HEMCO casework grouping and be compliant to all dimension, space, and access standards as specified by ADA. In addition, all electrical services, plumbing accessories and safety equipment including emergency showers and eye wash stations are designed to meet ADA guidelines. Counter top height is 34". For ADA recommended reach see diagram 1 and 2.

Simply add "ADA" as a suffix to any HEMCO part number and HEMCO can design, quote, and supply ADA compliant equipment. Proper planning eliminates/reduces future problems. For a complete guide for all ADA technical information, including dimensions and standards. please visit: www.access-board.gov.

HEPA filter 99.99% efficient (Inside Replaceable) (for 24" X 48" module)	52200

Clean Aire In-Line Carbon Filtration Exhaust Systems for capturing Cannabis odors

Note: HEMCO recommends a minihelic or magnehelic gauge to monitor the air flow differential across the filter. The static pressure indicated would alert when to change filter. The gauges can be hood or filter mounted. We recommend ordering a back-up replacement filter. Designed to clean up fume hood exhaust fumes. Carbon filtration removes unwanted odors & vapors. Select your fume hood exhaust blower from the chart below.

In-Line Carbon Filter Pak

Clean Aire Carbon Filter Pak

CFM	Size		Duct Size	Cat. No.	
250-650	26" x 15" x 35 1/2"		4", 8" diameter	50297	
650-1200	26" x 26" x 35 1/2"		8", 10", 12" diameter	50298	
Carbon Filters			Prefilter (6 per carton)

Laboratory Emergency /Shower Decontamination Booths

Full body emergency shower & eye / face wash, both with immediate response activation handle.

Durable one-piece seamless fiberglass construction with glass smooth white surfaces and coved corners for ease of clean-up.

Emergency showers available with translucent frosted strip curtains, which provides for easy access into booth, while containing contaminated water splash.

Stainless steel Grab bars located on right & left sides to support victim and rescue personnel during decontamination, included.

Plumbing is provided, for installation by local certified plumber. Plumbed to single point 1.25" IPT. connection. Tempered warm water supply connection 20 GPM water supply is required.

Raised fiberglass deck with self draining containment basin, and 2" diameter drain outlet located on either the bottom or rear of unit.

Industrial Applications

Emergency Drench Shower Booth

unit is equipped with pull rod activated overhead drench shower and rear wall mounted eye/face wash.

Cat No. 16601

Laboratory Applications

Emergency Drench Shower Booth

same specs as above except with finished exterior side panels.

Cat No. 16604

Cat. No. 16601
For Industrial Applications
shown above

Note: OSHA & ANSI require that emergency shower is to be located within 10 seconds walking time from the hazardous site location.

Overhead Drench Shower

Shower unit features 10" diameter plastic head and 1" IPS brass "stay open" valve with rigid pull rod and handle.

Cat. No. 16088

Alarm Horn & Light

Audible warning sound when system is activated by flow switch. Top mounted visual warning light when system is activated.

Cat. No. 16680

Eye/Face Wash

Wall mounting unit features two large plastic heads, push plate operated "stay open" ball valve. 1/2" IPS inlet, and 1.25" IPS drain.

Cat. No. 16006

Eye and Face Wash Options

Hand Held Body Wash

Squeeze valve nozzle on 8' coiled hose and bracket. Can be used to rinse all body parts while victim is sitting or lying down. Wall or hood mounted, 3/8 NPT, barrier free.

Cat No. 16005

Swing-Out Eye Wash

Deck mounted next to sink. Activates when pivoted. 1/2" NPT. Barrier free.

Cat. No. 16009

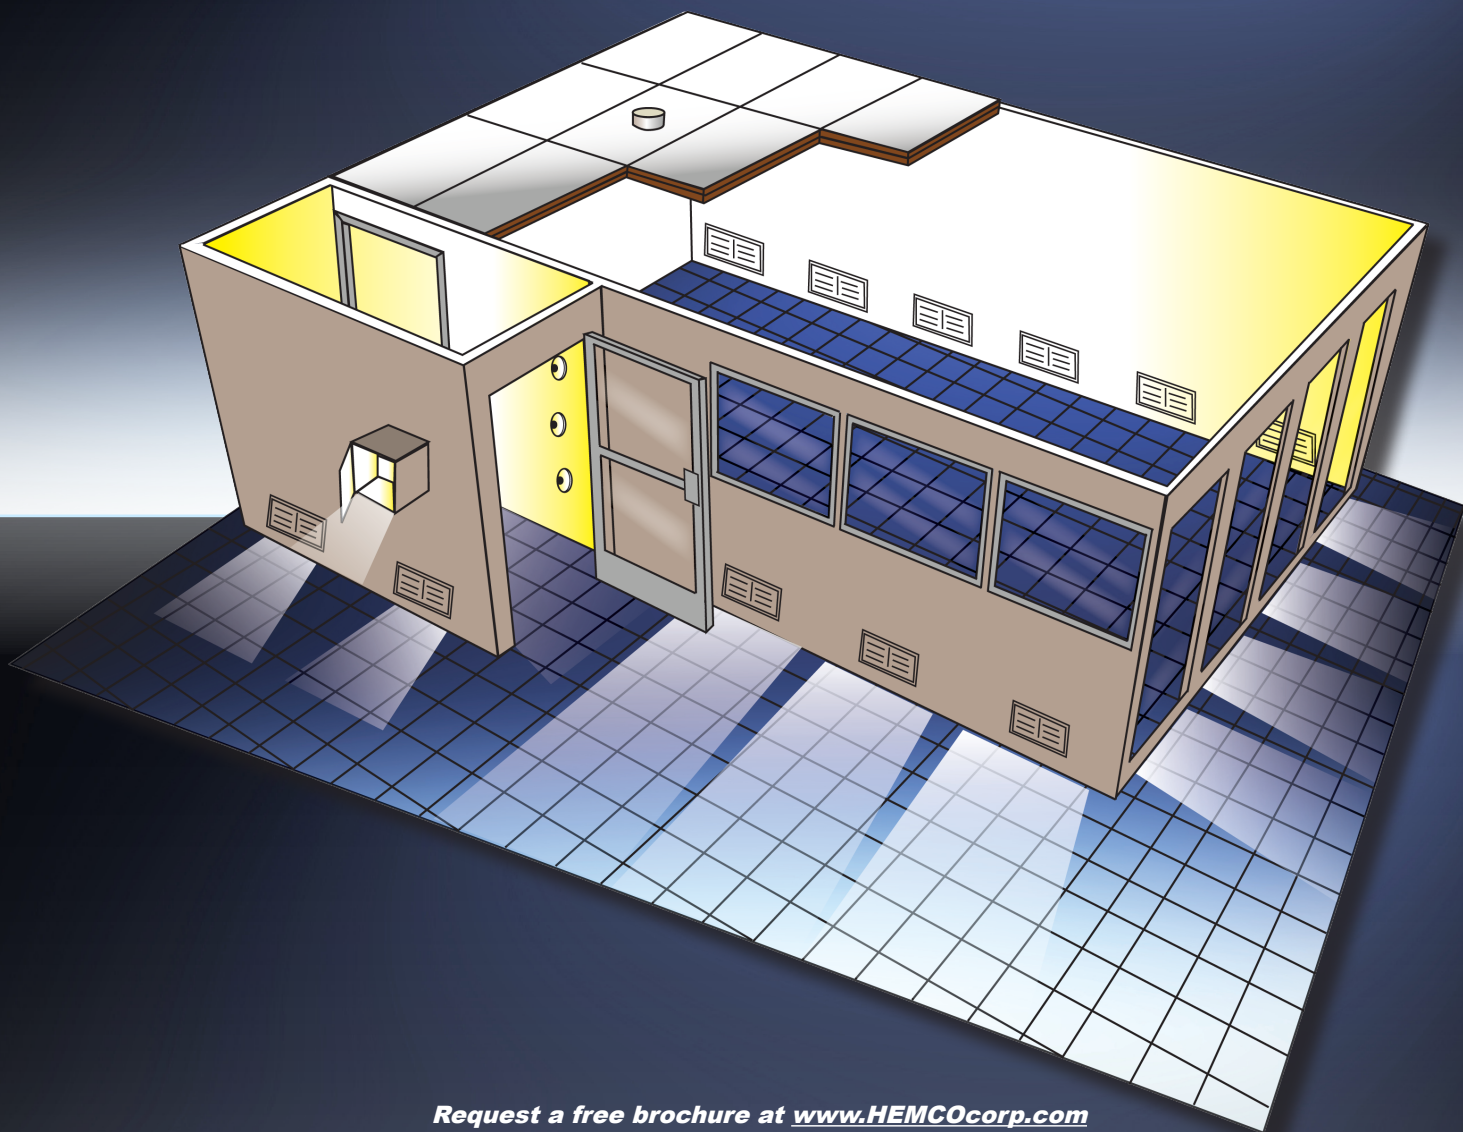

Hand Held Eye/Face & Body Wash

Mounted on the front side-wall of the fume hood. Includes 8' hose and surface escutcheon. 3/8" NPT. barrier free.

Cat. No. 93966
